SAMPLE

I write to you as a concerned member of [Your Electorate]. I call upon you to take immediate action to address our pressing environmental concerns arising from corporate fossil fuel operations in Australia. Our community stands united in seeking a sustainable future. We believe it is imperative to stop Woodside, Australia's biggest oil and gas company, and one of our biggest corporate climate polluters,¹ from further damaging our natural world and climate.²

The Burrup Hub is slated as the most polluting project ever to be developed in Australia.³ With estimated total emissions of over 6 billion tonnes (gigatons) of carbon pollution across its lifetime, the proposal has profound implications for the global climate across generations.⁴ Recent reports indicate that Woodside's Northwest Shelf project could contribute to climate change on an unprecedented scale, with potential emissions equating to a decade of Australia's carbon pollution.⁵ The Environmental Protection Authority has expressed concerns over the insufficient pace of emissions reduction at Woodside's Pluto LNG facility, which poses a threat not only to our climate⁶ but also to our cherished World-Heritage-nominated rock art. Finally, the proposed Browse gas project is set to increase Australia's carbon emissions drastically, undermining efforts to combat climate change and threatening our unique biodiversity.⁷ This is not the legacy we wish to leave for future generations.

We call on you, our elected representative, to voice our concerns in parliament and advocate for policies that will ensure Woodside's accountability to environmental preservation and climate action. Our votes entrusted you with the power to influence change; we now look to you to exercise that power for the good of our environment, our community, and our planet.

In light of these pressing issues, we seek not only your vocal support in parliament but also a personal engagement with our community. We invite you to meet with us, to hear our concerns first hand and discuss viable solutions that balance development with environmental stewardship.

Yours sincerely

Signed by _____
